

SAMUELE POMA

Software Engineering Student | Seeking a Graduation Internship

Middelburg, Netherlands | samuelepoma45@gmail.com | github.com/SamuelePoma

PROFILE

Fourth year ICT student at HZ University of Applied Sciences, specializing in software engineering, with internship experience at Conneqtech. My technical skills include Go, React, TypeScript and Java, supported by practical experience in collaborative web development projects. Seeking a graduation internship where I can investigate software engineering problems and develop a practical solution.

TECHNICAL SKILLS

Languages: Go, TypeScript, JavaScript, Java, PHP, Python, SQL

Frameworks: React, SvelteKit, Laravel, Tailwind CSS

Tools and databases: Git, GitHub, Docker, MySQL

Engineering: Frontend and backend development, object-oriented programming, design patterns, domain driven design, Agile teamwork

EXPERIENCE

Conneqtech | Software Engineering Intern | September 2024 to January 2025

Developed the frontend and backend of a GPS monitoring dashboard for cars and bicycles, using Go. Took the project from problem analysis and requirements definition through implementation to final product delivery. The dashboard helped Conneqtech and its customers track vehicles and access their GPS data and associated vehicle information in one place.

Rondinella & Partners S.R.L. | Web Development and Marketing | 2020 to 2022

Managed web development, mailing and marketing activities, balancing deadlines and day to day responsibilities.

Artemis S.R.L. | Administrative Support | 2019 to 2020

Supported company management through administrative work and direct communication.

SELECTED PROJECTS

Progmatic | AI Knowledge Assistant Research | September 2026 to present

Working in a team of five to research an internal AI assistant for technical and organizational knowledge. Investigating document retrieval, FileMaker integration, access control and data confidentiality through client meetings and requirements analysis.

MuseTrail | SvelteKit and Docker | November 2024 to January 2025

Developed a web application in a team to promote sustainable digital habits among young adults. Contributed to frontend and backend development and team leadership. The project won the grand prize in a Dragons' Den competition.

ChessGame | Java | December 2024 to January 2025

Developed a text-based chess game using object-oriented programming and design patterns.

Stedin University Project | Laravel, PHP and MySQL

Collaborated on software for visualizing power usage and monitoring faulty transformers across regions in the Netherlands.

EDUCATION

HZ University of Applied Sciences | BSc ICT, Software Engineering

Middelburg, Netherlands | 2023 to 2027 | Expected graduation in 2027

LANGUAGES AND TRAINING

Italian: Native | **English:** C1

English C1 course, Morgan School (2022) · Introduction to Web Development, Raspberry Pi Foundation and National Centre for Computing (2023)
